OBJECTIVE

Software Engineer with hands-on experience building and deploying backend systems using Spring Boot and PostgreSQL. Passionate about designing scalable REST APIs, automating complex workflows, and delivering reliable engineering solutions through clean and maintainable code.

TECHNICAL SKILLS

- **Languages:** Java, SQL, Python
- **Backend:** Spring Boot, Spring Data JPA, Spring Security (JWT), REST APIs
- **Frontend:** React, HTML, CSS
- **Tools:** Git, GitHub, Docker, Postman, IntelliJ, Vercel, Render, AWS Basics

WORK EXPERIENCE

Software Developer Intern — Good Bugs Solutions, Chennai

Jan 2026 – Mar 2026

- Developed an FX Trading Portal with 4 modules — Currency Exchange, Transactions, Rate Management, and Position Tracking.
- Built REST APIs using Java and Spring Boot with a React frontend.
- Deployed on AWS EC2 with RDS PostgreSQL and Docker.

Java Full Stack Developer Intern — Agamahil, Chennai

Oct 2025 – Dec 2025

- Built 3 HRMS modules (Payroll, Attendance, Operations) using Spring Boot and React, automating payslip generation and reducing manual HR processing effort.
- Engineered RBAC with Spring Security and JWT across 4 user roles, and integrated ESSL biometric hardware for attendance tracking, ensuring only authorized roles could access sensitive employee data.

PROJECT WORKS

PrepRoom | Java, Spring Boot, Spring AI, React

[GitHub]

- Built an AI mock interview system — user uploads a resume, system asks role-specific questions one by one, with live feedback.
- Also built a quiz mode that generates all questions upfront in one AI call, so answers are scored instantly with no wait.
- Handled AI errors (bad output, network issues) so the system fails gracefully instead of crashing.

AspectPulse | Python, spaCy, DistilBERT, Streamlit

[GitHub]

- Collaborated on a tool that gives separate sentiment for each part of a sentence, instead of one label for the whole sentence.
- Used spaCy to find key aspects in the text, then split the sentence to isolate the part near each one.
- Ran a pretrained DistilBERT model (91% accuracy) on each part, with a Streamlit interface to test it live.

EDUCATION

B.Tech Artificial Intelligence and Data Science

CGPA: 8.52

Rajalakshmi Institute of Technology, Chennai

2023 – 2027

HSC (12th) — Infant Jesus Matriculation Hr. Sec. School, Pallikaranai, Chennai

92.8%

CERTIFICATIONS & ACHIEVEMENTS

- **C-DAC:** Scored 80%+ in AI & Cloud Computing Bootcamp (Ministry of Electronics & IT, Govt. of India).
- **REFRESH'25 Finalist:** National-level Technical Quiz finalist at St. Joseph's College of Engineering.
- **Problem Solving:** Solved 450+ coding challenges on Skillrack, strengthening logic building and programming fundamentals.
- **DSA Practice:** Solved 100+ problems across NeetCode 150 and LeetCode using Java and Python .
